Includes pricing!

Phone calls only

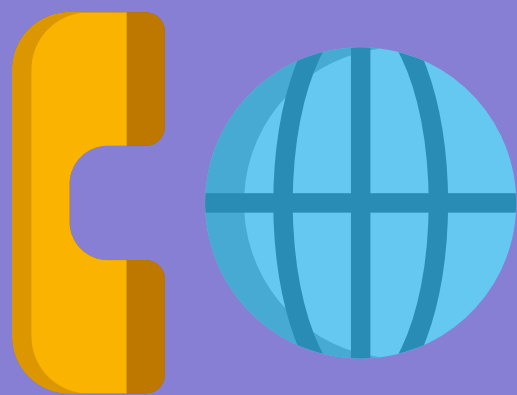

As PSTN services come to an end, it's important to note that your analogue phone lines will cease to function, leading to a disruption in all your communication channels.

Internet only

With the termination of PSTN services, your analogue internet line will be disconnected, resulting in a halt to all internet activities

What do you use your line for?

Phone + Internet

By seamlessly integrating the necessary processes, we can replace your existing broadband with a new internet connection, retain your phone number, and ensure you are prepared for the upcoming copper shutdown.

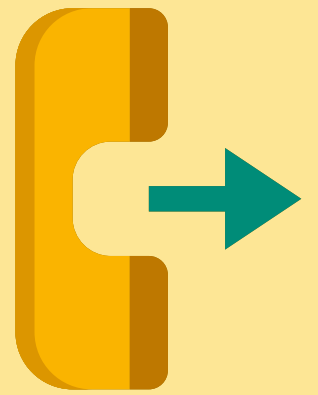

3rd Party Devices

(Alarms, card readers, CCTV and more)

The end of PSTN services will mean that your analogue phone lines will stop working, which will affect all your 3rd Party Devices.

Landline used for Phone calls only

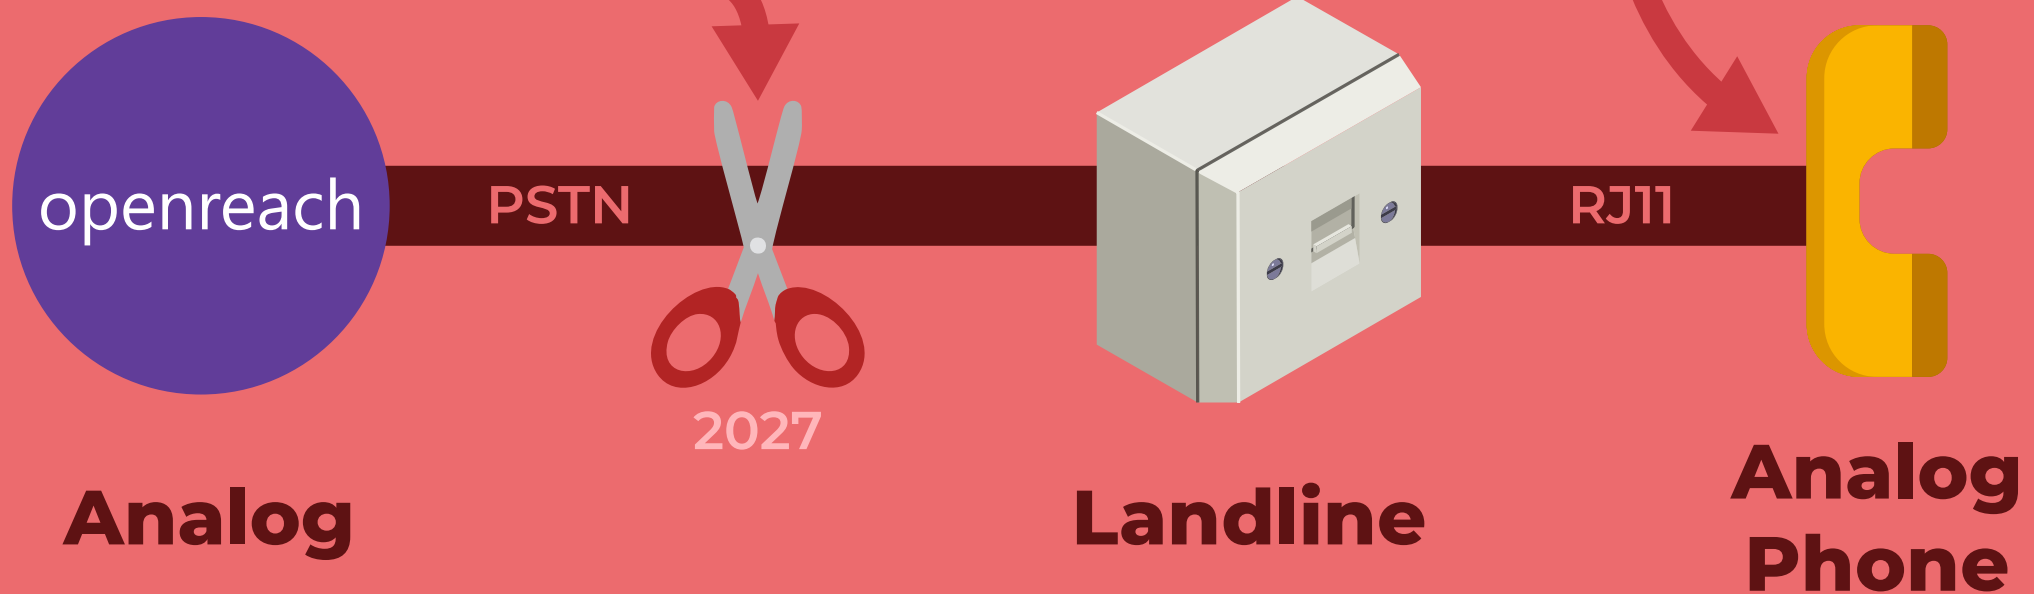

£10.95
Per Month

PROBLEM

When PSTN services end, your analogue phone lines will stop working, cutting off your communication channels.

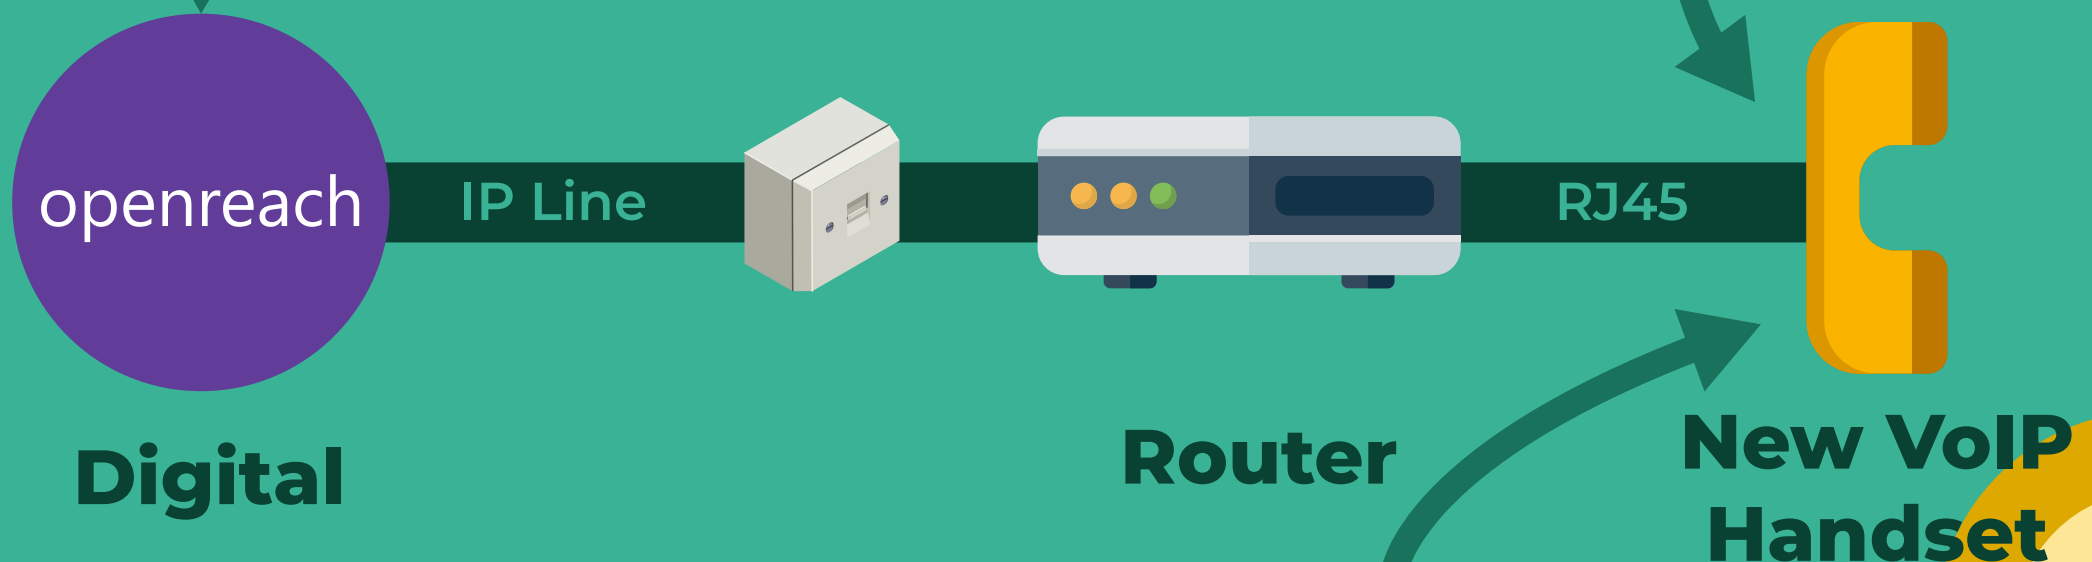

Your business uses traditional landline phones, including desk phones or PBX systems on analogue lines.

SOLUTION

Dunedin IT can install a new broadband if required

Provide a new handset (fixed or cordless) which plugs directly into your internet router

We will manage the transfer process of your existing number

Convert your voice communications to VoIP

Copper Shutdown

Be ready for the copper shutdown

Starting
£39.95
Per Month

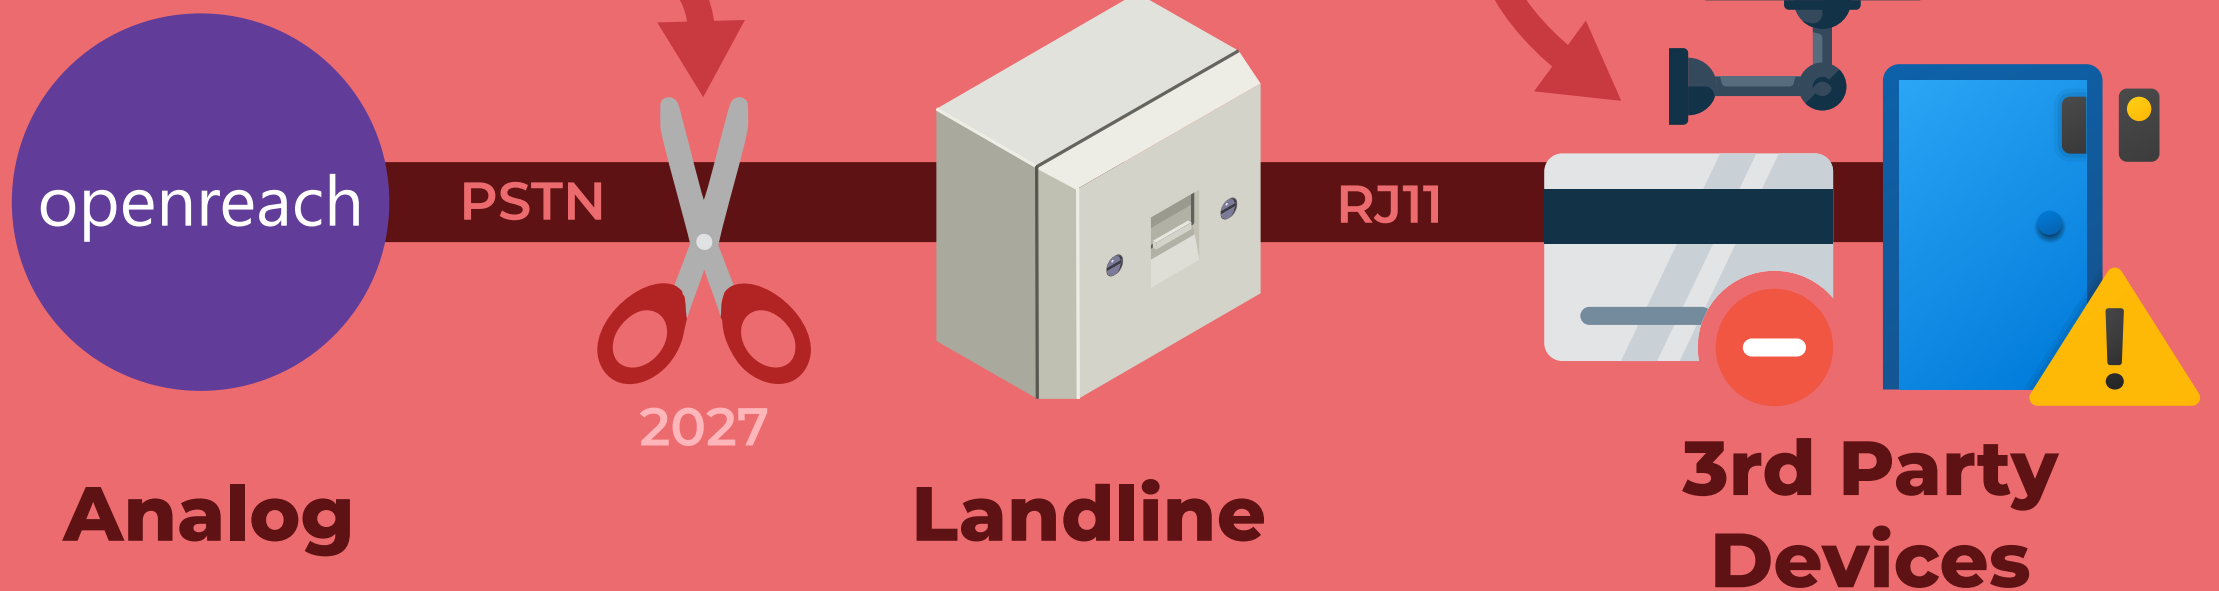

Landline used for 3rd Party Devices

PROBLEM

When PSTN services end, your analogue phone lines will stop working, cutting off your 3rd Party Devices.

Alarms, card readers, CCTV, EPOS machines, lift emergency lines, door entry systems, and more.

SOLUTION

Replace your existing BT Openreach socket with a fully managed 4G router, into which your device can be plugged.

Devices simply plug directly into the 4G Router supplied, no complicated adaptors needed.

Note that a power outlet will be required for the router at the required location.

Starting
£17.50
Per Month
